

## **M101A1 HOWITZER**

**Service: 1940 to Present**

**The 105mm M101A1 howitzer (previously designated M2A1) is an artillery piece developed and used by the United States. It was the standard U.S. light howitzer in WW II. It served in all theaters of operation and would continue serving in the Korean and Vietnam wars and with many countries world-wide.**

**It has a reputation for accuracy and good range reaching out to 11,270 meters. The eight- man crew could fire 10 rounds a minute maximum or 3 rounds a minute for sustained fire.**
